Mickey Stool

BY MARKUS BERENWINKEL & CHRISTOPHER SCHMIDT
ITO DESIGN FOR FLOKK

AS ACTIVE &
dynamic
AS YOU ARE

Mickey is a contemporary seating solution with an innovative seat design. Soft profiled foam makes sitting comfortable and the innovative tilt function gives the user flexibility to freely move and the seat follows.

Height adjustment and swivel function provides active support even in a standing position. The compact design makes Mickey easy to move around. The dynamic stool is the perfect addition to any sit/stand work environment including acoustic phone booths and meeting rooms.

 Soft, profiled foam makes sitting more comfortable.

 With its tilt function, the seat follows the user's position.

 Height adjustment range (13in) and swivel function provides active support even in a standing position.

 Compact structure makes Mickey easy to move around.

Mickey has achieved prestigious design recognition for its innovative, beautiful and adaptable design.

Designed by German industrial designers, Markus Berenwinkel, Christopher Schmidt, Product Designers of ITO Design.

"Searching for a contemporary seating solution for the modern office space, we developed a product which adapts to the evolving requirements of modern workplaces. We designed it to be compact, lightweight and easy to move around; this creates increased flexibility and spontaneity in the work environment."
